DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a toilet brush cleaning system, classified in class 15, subclass 104.092.
- II. Claims 21-24, drawn to a method of cleaning, classified in class 134, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of group I may have a different method of use than group II such as a cleaning agent may be added before or after the brush is inserted, the toilet bowl brush may be stored on the wringer without contacting the cleaning agent, the third level may not be removable, or the user may drain the cleaning agent into a sink or toilet receptacle instead of a third level.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

• Art Unit: 1744

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
